Trial Grounds and Demonstration Farm
Ferndale, Charleston County

WHOLESALE CATALOGUE

of

MIXSON'S HIGH-GRADE SEED

For Merchant Trade Exclusively

We hand you herewith our Wholesale Catalogue for 1919, in which you will find listed a full line of Vegetable, Field and Farm Seeds, together with Feeds, Remedies, Insecticides and Appliances.

We spare no pains in having MIXSON'S SEEDS high-grade in every particular, and they are as perfect as scientific breeding and careful handling can make them. We have them grown in the most favorable seed-producing centers of the world, and offer them to you with the full confidence that they will please your most critical trade. We make careful tests for germination and purity in our own laboratory, and for trueness to type and adaptability on our Ferndale Trial Grounds.

CHANGES IN PRICES

Prices quoted herein are those ruling January 20, 1919, and we will hold them as long as possible. However, the Seed crops in Europe, as well as in this country, on some very important items are very short—so much so that the Wholesale Seed Trade in this country is facing a critical situation. Our advice, therefore, is to buy early, as stocks of some items are sure to be exhausted before long. On Field Seeds and Poultry Feeds, where prices fluctuate very rapidly, we will issue periodically our Yellow Quotation Card, giving current values. If you are interested in receiving it, write us, so that your name may be placed on our regular list. This Catalogue gives prices only; for full descriptions see our Retail Descriptive Catalogue.

TERMS

To approved customers our terms on Vegetable Seeds are 30 days, less 1 per cent. if paid within 10 days from date of invoice; Cotton Seed, Field Corn, Field Seeds, Feeds, etc., are net cash on receipt of goods. If in sending us your first order you wish to open an account, send us satisfactory references, unless you are rated in the Mercantile Books.

Where advisable for the proper carriage of Seeds, we use Cotton Sacks, and they will be charged extra at cost. No charge for burlaps. Our prices are F. O. B. any depot or wharf in Charleston. No Drayage in Charleston is charged.

ABOUT WARRANTING SEEDS

We test for purity and germination each and every bag of seed we send out, and guarantee it to be satisfactory when shipped, but there are so many other causes of poor crops—too deep or too shallow planting, too much wet or too much dry weather, etc., etc., that it is impossible to guarantee germination and production. Therefore, in common with the other members of the American Seed Trade Association, while we take every care and precaution to have our seeds strong in germination and true to type, we give no warranty, expressed or implied, as to description, quality or productiveness or any other matter on any seeds we send out, and will not be responsible for the crop. If the purchaser does not accept the seed on these terms, they are at once to be returned.

MIXSON'S HIGH-GRADE SEEDS
IN
LITHOGRAPHED PACKETS

We supply in packets all standard varieties of Vegetable Seeds. The seed used is the identical stock that we supply to our largest bulk customers. They will build up your business by satisfying your customers. We do not put out commission boxes, and hence have no old seed to take back at the end of the season. Our seed are therefore fresh, pure and reliable. The varieties which we supply in packets are marked with an (*). Others are sold in bulk only. Following are prices:

Beans, Peas, Garden Corn	\$5.00 per 100
All others	\$2.50 per 100

The Beans, Peas and Corn ordinarily retail at 10c per packet and the others at 5c. You can easily see the large margin of profit. The packages are beautifully lithographed, and are all clean and newly put up.

DISPLAY RACK FREE

On orders amounting to 500 or more packets we will send a Display Rack, Free of Charge. This rack will show off the packets to advantage. Packets are beautifully colored, and will be ready sellers. Moreover, your trade will be pleased with the high quality of Mixson's Seeds.

The crop of beans this season was anything but full—in fact, several of the most important varieties are very short. In spite of that, there are some dealers who are quoting rather low prices. We know, however, that there are some who held their beans for high prices last spring, and had them left on their hands. All of our stocks are absolutely new crop, such only as we supply to our high-grade market garden trade. In conformity with the generally accepted trade custom, we are this year quoting by the pound. 60 lbs. make a bushel, or 15 lbs. a peck.

SEED POTATOES

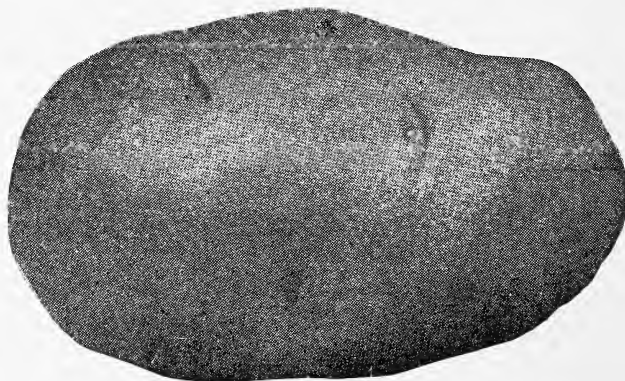

IRISH COBBLER POTATO.

Seed Potatoes is one of the heaviest items in our business, and is one to which we pay particular attention. The fact that we have supplied a very large number of the most critical truck growers along the South Atlantic coast for years, men who buy the very best stocks possible, is sufficient evidence of the purity of our stocks. We do not aim to compete with some commission or grocery houses, who know very little about the pedigree of the seed they handle. In the selection of our stocks, our Mr. W. H. Mixson makes a personal visit to Maine, during the harvest season, and sees our potatoes put away. We can therefore assure you that in ordering from us you get nothing but the very best. We were also the original

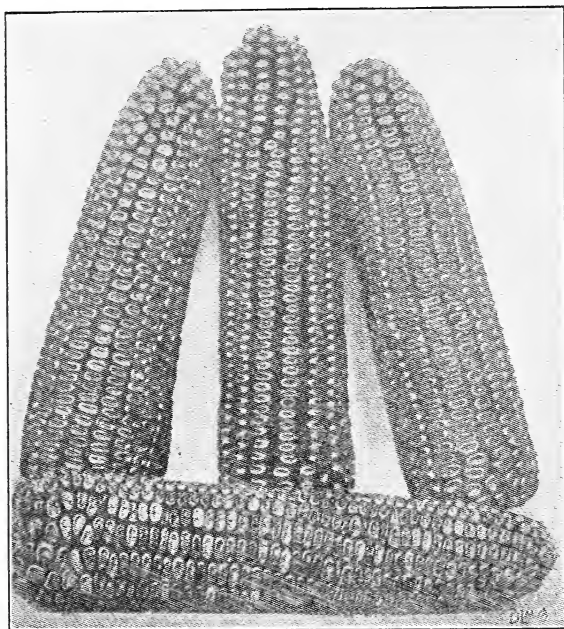

introducers of the Northwestern Rose Potato. It is grown especially for us under contract, and is the same stock with which we have pleased our many customers for the past five years. The prices quoted below are those prevailing January 20, 1919. They are based on a sack of 150 pounds or 2½ bushels. It is impossible, however, to give prices that will hold good during the entire season, as the market may fluctuate. When you are therefore in the market, write us, stating quantity of sacks wanted and we will quote you very lowest prices.

Present prices follow:

	Per sack
Irish Cobbler	\$6.00
Mixson's Northwestern Rose (Genuine)	6.00
Maine Grown Early Rose	6.00
Red Bliss or Bliss Triumph	7.00
Lookout Mountain	Ask

MIXSON'S NORTHWESTERN ROSE POTATO.

MIXSON'S EUREKA CORN

MIXSON'S HIGH-BRED SEED CORN

Our trade in Seed Corn is increasing every year, due entirely, we believe, to the high-grade stocks we put out. Our first care is to see that the crop from which our seed comes is pure and true to type; then our seed is saved only from selected ears, and that after the ears have been carefully butted and tipped. A great deal of the grading and cleaning is done right in our own warehouse, and we therefore know the quality of our stocks. Our Corn is all re-cleaned and packed in strong, even-weight bags. We handle acclimated stocks only, inasmuch as they are better than Northern or Western-grown seed.

MIXSON'S SELECTED COTTON SEED

Our cotton seed business has so steadily and rapidly grown that we have been forced to make a separate department of it in our business. We have in charge of this department a man who has had a long experience in the selection and handling of cotton seed for planting purposes. He gives his entire time to this work. We supply our seed stocks, the best which can be secured, to our growers who are very careful and strictly reliable planters. Our cotton seed man visits the crops from time to time during the growing season, and sees to it that the cotton is ginned properly, and that the seed is not damaged or mixed.

In securing our seed stocks in this manner we know exactly what our stock is and feel justified in recommending it highly to our customers. We know exactly the origin of each variety which we list, and are in a position to intelligently inform our customers in regard to any of them.

Inasmuch as the boll weevil has moved Eastward until he has reached the Atlantic Coast, farmers in the Southeast should not lose sight of the fact that the quickest and surest way of beating him is to plant the earliest maturing varieties that can be found. We have the best improved stocks of King Early and Simpkins Ideal, grown for us in the Northern Cotton producing section of North Carolina. We have been furnishing these two varieties to farmers in the boll weevil section for a number of years, and they have been more than pleased with results. We recommend them very highly for the boll weevil section, after early truck, or anywhere an early cotton is desired.

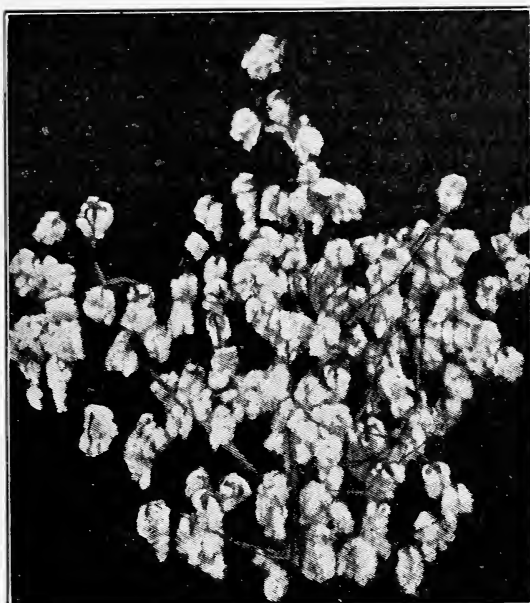

SHORT STAPLE

MIXSON'S EARLY BIG BOLL COTTON

Mixson's Early Big Boll Cotton at the Clemson College Experiment Station stood first in a test in which sixty-eight varieties of cotton were included. It stood first of all in yield, and proved earlier than all big boll varieties in the test. Six hundred pounds of lint per acre was picked up to September 7th, and eleven hundred pounds up to October 7, 1918.

This cotton is our own production and it has shown itself to be the best of all large boll varieties. Our stock is limited this season, so place your orders at once.

STALK OF CLEVELAND B.G BOLL COTTON

In regard to our improved Cleveland Big Boll Cotton, we have the purest and prettiest stock we have ever seen. We have been selling this selection for a number of years and our customers are extremely well pleased with it. Mr. G. W. Trask, of Wilmington, N. C., informs us that from 36 acres, on which he planted our Cleveland in 1918, he harvested 51 bales of cotton. A part of it was planted after truck. This is a record of which we are proud. Cleveland is a popular variety all over the cotton belt, but unless you get the pure, straight stock, you are not getting what you buy, and certainly you will not get the proper results. This cotton has a full inch of staple, is a heavy producer in the field, boll running about 65 to the pound, and cotton pickers would rather pick it than pick any other variety. Our stock is all grown on one farm, ginned at one gin, properly dried and cleaned, and neatly put up in our trade mark bags.

UPLAND LONG STAPLE

	100-bu.	25-bu.	Per bu.
Webber No. 49	\$1.80	\$1.90	\$2.00
Hartsville	1.80	1.90	2.00
Mixson's Wilt Resistant	1.80	1.90	2.00

SEA ISLAND LONG STAPLE

Our seed stock of this variety comes from the famous Sea Islands on the South Carolina coast. Here this cotton reaches its highest perfection. We know personally all of the growers and breeders of this cotton. This puts us in a position to furnish the very best stocks obtainable. Our output of this cotton is planted to a large degree, away from the Sea Islands, mostly in Southern Georgia and Northern Florida. However, the seed has to be renewed every one or two years, as it deteriorates when planted away from the islands. The average staple brings 70 to 75c per pound. 100 bu. \$2.60, 25 bu. \$2.70, per bu. \$2.80.

All of our seed are put up in new bags of 2½ bushels each, branded with our trade mark, which insures your getting the genuine article. We guarantee that the crops from which our seed were grown were free from anthracnose, insects and dangerous plant diseases which would be communicable from year to year.

We have what appears to be an adequate stock based on what we have sold in past years, but by all means, we advise that orders be placed as soon as possible as we expect a large demand for planting seed this Spring.

MIXSON'S HIGH-GRADE FIELD SEEDS

We exercise the greatest possible care in the selection of our stocks listed in this department, and tests are always made for purity and germination. During the last year we have installed in our building a modern and complete cleaning equipment second to none in the South, and it is here that we do the bulk of our recleaning and grading. We do not believe that it is possible to find stocks that are purer or of a higher germination than ours.

Prices and Market Conditions

Prices on all Field Seeds are subject to fluctuations. The prices we quote are in effect when this catalogue goes to press, but they are liable to change at any time. Therefore, for the benefit of our merchant customers who wish to follow the markets, we will issue periodically during the planting season our Yellow Quotation Card. We will also be glad to quote by telegraph or letter any time.

Terms on all Field Seeds are Cash on Receipt of Goods

MIXSON'S PERPETUAL PASTURE MIXTURE

This celebrated mixture contains several grasses and clovers so combined that continuous pasturage is afforded. After long experimental work, we have no hesitancy in recommending this mixture for grazing purposes. It is best planted in the autumn and fall, though good results also can be obtained when planted in the spring. Per lb., 28c; 100 lbs., per lb., 25c.

MIXSON'S HIGH-GRADE GRAINS

SEED OATS

Our Oats are all choice re-cleaned stocks, carefully selected and tested. Our Oats are different from the stocks often offered by grocery and commission houses, and any difference in price will be more than offset by difference in quality. All put up in new 5-bushel bags.

Prices liable to fluctuations. Ask for prices when ready to buy, or watch for our Yellow Quotation Card.

Inoculation for legumes is best supplied by means of FARMOGERM. It is the standard inoculation, and from our experience gives us the best results.

We are able to offer Farmogerm at a very attractive price, for a limited time only, as the purchase we made which enables us to make this price cannot be duplicated and this price can only be maintained while our present stock lasts. The standard price is \$1.50 per acre.

1-ACRE SIZE, 50c; 5-ACRE SIZE, \$2.50.

Our stock includes inoculation for all standard spring legume crops, as follows:

COWPEAS	PEANUTS	SOY BEANS
LESPEDEZA	VELVET BEANS	ALFALFA
GARDEN PEAS	LIMA BEANS	GARDEN BEANS

We also have inoculation for fall crops, such as Vetch, Clover, Alfalfa, etc.

INSECTICIDES, FUNGICIDES, SPRAYING MATERIAL

DRY POWDERED ARSENATE OF LEAD

"Corona Dry"

The Universal Insecticide

½-lb. pkgs., per lb.	46c
